## Career Objective

A Frontend Engineer with three years plus of appreciable experience developing SaaS applications. I have worked in Frontend positions where I bring architectural designs to life. I am comfortable as an independent developer or team player, and eager to obtain a challenging position in a prestigious Company like yours.

I'm adept in OOP, follow best practices and keep up with standards. I'm proficient in frontend from conception to publishing. My professional time has been spent modifying and building large applications. I've worked extensively with modern frameworks such as React, Next, Redux, Tailwind, Angular, Bootstrap. I strive to deliver quality results. I'm driven by meeting deadlines. I learn quickly and I'm willing to work with new frameworks, languages, tools and technologies.

**Technical Skills:** Software Development, Frontend Design, JavaScript, React, Next, Angular, Typescript, HTML , CSS, Bootstrap, Postman, Git, Redux, Antd, Material UI, Technical Support, G-workspace.
